

Linda Leckman Family Scholarship—2023
Amount: \$2500 per recipient

This scholarship is being offered to young women either of minority heritage or first generation college students who plan to major in an area of science, technology, engineering or mathematics. The scholarship is renewable for four years total. The applications are due April 10, and interviews of selected candidates will follow.

Other requirements:

1. The student must enroll for at least 12 hours and stay in a STEM major
2. To renew the scholarship the student must maintain at least a 3.0 cumulative GPA and submit their college transcript. If the GPA is lower than 3.0, the student would need to reapply for consideration.
3. Deferments not in excess of two years for government, religious or institutional service will be considered if a written request is submitted.
4. The scholarship funds will be sent to the college chosen by the student.
5. The recipient(s) will be determined after submission of an essay, review of the high school transcript and any other appropriate information, and an interview.
